

Women in Leadership — Sponsorship Prospectus

About the series

Women in Leadership is a new recurring series from the Japan America Society of Chicago (JASC) that brings together women leaders across business, education, government, and the arts who work at the intersection of the U.S. and Japan. Each gathering pairs accomplished women leaders with candid conversation, structured networking, and unhurried time to build relationships.

The series will meet quarterly, four luncheons a year, so that connections made at one gathering can deepen at the next.

For 96 years, JASC has connected Chicago and Japan through cultural, educational, and business exchange. This series extends that mission by building a lasting community of women who lead, mentor, and open doors for one another.
